BOXER PHS SEEDING COMBINATION

The Boxer PHS is a compact power harrow with integrated seeder, ideal for small tractors. Suitable for grasslands, vegetable crops and horticulture, this combination offers high efficiency by roto harrowing and seeding simultaneously. With an adjustable leveller, three-point intake and heavy-duty oil-bath drive train, the Boxer PHS is robust and easy to use. The sharp cutting tines ensure effective soil refining with minimal tractor power, while the seeder is always driven, without skidding, for reliable seeding results. Perfect for compact and mini tractors.

PHS115: €3,950.00

PHS135: €4,100.00

Specifications
