DONDI DRENAG TRENCHER

The milling device that makes it possible to create a trench 8, 14 or 20 cm wide with perfectly vertical walls. The maximum depth varies from 50 to 100 cm based on the model. The excavated soil can be spread on the right side or placed on the edge of the trench for possible backfilling. "DRENAG" is usually used to dig trenches for laying drainage wells, irrigation pipelines, cables and pipes of any kind. The machine is designed to work on agricultural land and any kind of soil terrain.

On request, the "DRENAG" can be equipped with a pipeline kit to construct a trench and a pipeline at the same time in one pass.

50-540: €8,060.00

60-540: €9,875.00

**75/100-540:
€17,375.00**

**75/100-1000:
€17,375.00**

**100/120-1000:
€28,335.00**

Specifications
