PRONAR T027M BALE WAGON

PRONAR T027M is a two-axle bale trailer that can load up to 32 bales with a diameter of 1200 mm. The trailer is designed to carry straw, silage bales or transport loads that require large, flat surfaces, such as pallets or mauser-type tanks. The length of the loading platform is 8500 mm, the payload capacity is 13.2 tonnes (with standard equipment). The loading platform of the T027M trailer is suspended on parabolic springs. The chassis consists of two axles with 400 × 120 brakes. The PRONAR T027M trailer is equipped with a turntable with a diameter of 1100 mm, which allows 360° rotation. This ensures very high manoeuvrability both on the road and in the field. The drawbar supported by the spring facilitates merging with the tractor

€19,025.00

Specifications

DIMENSIONS

Height of loading platform from ground	1100
Loading platform height	1790
Loading platform length	9600
Loading platform width	2400
Overall height	2900
Overall width	2530
Soil thickness	3
Total length	10600
Track width	1960

OTHER

Maximum speed	40
Required tractor power	109

TECHNICAL SPECIFICATIONS

Loading capacity	20.4
