PRONAR T028KM BALE WAGON

Trailer PRONAR T028KM is a versatile product mainly designed for transporting bales, bales of straw or hay and also for transporting cargo on pallets. The main innovation in the design of the bale trailer, unlike previous models, are hydraulically lifted side walls to protect the transported load. Moreover, thanks to the possibility of fitting special stanchions on all sides of the trailer, stable and safe transport of logs, wood, timber and other long materials is guaranteed. The trailer's large loading surface and optimal payload capacity make it possible to transport a wide range of different materials and not only use the trailer in agriculture.

€43,090.00

Specifications

DIMENSIONS

Height of loading platform from ground	1110
Loading platform length	9900
Loading platform width	2470
Overall height	4585
Overall width	2945
Soil thickness	3
Total length	12000
Track width	1960

OTHER

Maximum speed	40
Required tractor power	124

TECHNICAL SPECIFICATIONS

Loading capacity	23.8

TECHNICAL SPECIFICATIONS
WEIGHT

Own weight	6950
Payload	16900
