TAF-P-125W

The TAF-P 125W is a powerful diesel generator from TAFE POWER with a prime capacity of 125 kVA. This professional power generator is designed for continuous operation in demanding environments such as industrial plants, construction sites, hospitals, utilities and telecom infrastructure. Thanks to its advanced turbo engine with intercooler, robust construction and excellent noise reduction, this generator is ideally suited for long-term and reliable power supply.

TAFE's years of experience in engine construction and cooperation with international technology partners guarantees maximum performance and minimum operating costs.

€20,900.00

Specifications

DIMENSIONS

Overall height	1905
Overall width	1300
Total length	3000

DYNAMO

Power Factor	0.8
RPM	1500

ELECTRICAL INFORMATION

Electric system	12 V
-----------------	------

ENGINE

Cooling	Water
Cylinder capacity	4910
Engine power	160
Power in kW	117.6

ENGINE TECHNICAL SPECIFICATIONS

Control panel	Electronic / Isochronous governing
Power KVA	125
Tank capacity	250

WEIGHT

Own weight	2210
------------	------
