BC20001000 POWERBANK

POWERBANK BC20001000 - Maximum energy capacity in one container

The BC20001000 is the most powerful model within the BC series, offering exceptional storage capacity of 2000 kWh and continuous power of 1000 kW. This battery container is designed for heavy industrial applications where maximum performance, reliability and scalability are required - such as grid reinforcement, large-scale energy storage, peak shaving or solar and wind farm support.

Key specifications:

- Storage capacity: 2000 kWh
- Rated capacity: 1000 kW
- Battery type: LFP (LiFePO₄)
- Lifespan: 6000 cycles (90% DoD)
- Rated voltage: 400 V AC
- Frequency: 50 Hz

With a powerful LFP (LiFePO₄) battery system, advanced HVAC cooling, comprehensive fire protection and an industrial Sinexcel inverter, the BC20001000 is built for reliable, long-term deployment on a large scale. This unit is at the heart of any modern energy solution
