TAFE 7515 GE

TAFE 7515 GE – Specially designed for orchards and vineyards

The TAFE 7515 GE is the specialist tractor for work in orchards, vineyards and other narrow-row crops. Thanks to its compact dimensions, low ground clearance and excellent manoeuvrability, this tractor works effortlessly between narrow rows and under low vegetation. The powerful 74 hp Stage V engine, combined with the robust 4WD drive, ensures optimum performance in all conditions.

With its synchromesh transmission and mechanical shuttle, the TAFE 7515 GE shifts smoothly and precisely, making it ideal for intensive tasks such as spraying, mowing, tilling and transport. The powerful hydraulics, with a lifting capacity of 2050 kg, allow for the efficient use of a variety of implements.

In terms of comfort, too, the TAFE 7515 GE offers everything a modern specialist tractor requires. The ergonomic controls, hydrostatic power steering and comfortable driver's seat ensure that long working days are both pleasant and efficient.
