BC200100 POWERBANK

POWERBANK BC200100 - Compact, powerful and flexible

The POWERBANK BC200100 is an industrial energy storage system with a storage capacity of 200 kWh and a rated output of 100 kW. This compact battery container is ideally suited for temporary power supply, grid replacement, peak shaving and storing excess renewable energy.

Technical specifications:

- Storage capacity: 200 kWh
- Rated capacity: 100 kW
- Battery type: LFP (LiFePO₄)
- Lifespan: 6000 cycles at 90% DoD
- Rated voltage: 400 V AC
- Frequency: 50 Hz

The BC200100 is equipped with safe LFP batteries, an inverter, HVAC system for temperature control, fire protection and real-time monitoring. Its modular design and robust housing make this unit quick to deploy and suitable for both mobile and stationary applications.

An ideal solution for companies in need of a powerful and reliable power source, independent of the grid.
